

Helmer Scientific Service Training Seminar

Helmer Scientific is offering Technical Service Training Seminars

The training seminar is designed for technicians with core maintenance, troubleshooting, and refrigeration skills and is available for all Helmer products. The courses are modular by product lines, and may be customized to meet specific goals. The seminars will be taught by Helmer Scientific technical staff and will provide in-depth training on diagnosing and servicing of Helmer products, as well as an opportunity for hands-on training. This approach will allow participants to obtain the most value for their investment by achieving both practical and theoretical knowledge of the products.

Helmer is currently offering multi day seminars covering the Helmer Refrigerator, Freezer, Incubator, Agitator, and Plasma Thawer products. Events with varied equipment topics are being scheduled throughout the year. The seminars will begin at approximately 8:30am and conclude at approximately 4:30pm on each day, further details and pricing are be available during registration. At the closing of the training seminar, attendees will be given a Certificate of Completion.

Seminar Location:

Helmer Scientific
14400 Bergen Blvd.
Noblesville, IN 46060

The seminar includes:

- Two to three days of service training
- Diagnosis and troubleshooting for Helmer products
- Preventive maintenance procedures
